

Aberdeen American Growth Fund

Investment policy

The fund will mainly invest in units of a foreign fund, Aberdeen Global-North American Equity Fund (Master Fund), at least 80% of its NAV in any accounting period. The rest will be invested in securities or other assets approved by the SEC and the Office of the SEC as the fund manager deems appropriate for the benefits of unitholders.

Source: Lipper, Basis: Total Return, NAV to NAV, net of annual charges, gross income reinvested, (USD).

Benchmark is for comparison purpose only. This fund is not managed against a specific benchmark.

The performance returns have been adjusted so that the proceeds of a class action received during the month of July 2012, relating to an investment held several years earlier, do not affect the performance for the month of July 2012 and the performance for all periods including the month of July 2012.

All return data includes investment management fees, performance fees, and operational charges and expenses, and assumes the reinvestment of all distributions. The returns provided do not reflect the initial sales charge and, if included, the performance shown would be lower.

Past performance is not a guide to future results.

^aThe fund returns to the reporting date are based on dealing NAVs using a 13:00 CET valuation point: for US Equity Funds this means the dealing NAV uses security prices at close of the previous working day. The benchmark index, if unadjusted, would use the closing prices of the reporting date: when a US Equity benchmark is compared against a US equity fund this valuation point difference may produce a significant distortion in benchmark-relative performance. In order to neutralise this distortion, the benchmark returns shown are to the day previous to the reporting date.

The risks outlined overleaf relating to single country market exposure and exchange rate movements are particularly relevant to this Fund but should be read in conjunction with all warnings and comments given in the prospectus for the Fund.

Aberdeen Global - North American Equity Fund

Important information

Risk factors you should consider before investing:

- The value of shares and the income from them can go down as well as up and you may get back less than the amount invested.
- Investing globally can bring additional returns and diversify risk. However, currency exchange rate fluctuations may have a positive or negative impact on the value of your investment.
- The Sub-Fund's exposure to a single country market, which may be subject to particular political and economic risks, may cause the sub-fund to be more volatile than more broadly diversified funds.

Other important information:

Please note the risk analytics figures are calculated on gross returns whereas the performance figures are based on net asset value (NAV) returns. In addition, the risk analytics figures lag the performance figures by one month. It should be noted that the figures provided regarding risk would be adjusted if fund fees and expenses were included.

Standard deviation measures historical volatility. Beta is a measure of the volatility of a portfolio in comparison to a benchmark index. Sharpe ratio measures risk-adjusted performance. Tracking error measures the divergence between the price behavior of a position or a portfolio and the price behavior of a benchmark. Information ratio is a ratio of portfolio returns above the returns of a benchmark to the volatility of those returns. R-squared is a statistical measurement that determines the proportion of a fund's return that can be explained by variations in the market, as measured by a benchmark index.
